

9-11 OCTOBER 2020

ESTORIL CLASSICS - LAST BUT NOT LEAST! THE FINAL RENDEZVOUS IN 2020 OF THE SERIES

The final rendezvous of the year for the series *by Peter Auto* is Estoril Classics. It's the first visit to Portugal for the competitors in the 8 grids racing there between 9th and 11th October. This meeting brings down the curtain on a season like no other, and yet for Peter Auto it is ending on a high note! This event has been made possible by the Cascais Tourist Office.

CLASSICS RETURN TO ESTORIL

Only a handful of competitors can boast of having already raced on the Estoril circuit back in 2011 when Classic Endurance Racing organised events as curtain-raisers at the Le Mans Series meetings. For the others it will be a major discovery as they will find themselves on a twisty undulating layout marked, in particular, by the passages through the Corkscrew and the Parabolica. Although this is the most modern circuit in the Peter Auto season it already has a rich history, especially in Formula 1: Ayrton Senna's first victory in 1985, the incredible head-to-head between Alain Prost and Senna in 1988, Ricardo Patrese's spectacular take-off in 1992 and Jacques Villeneuve's mind-boggling overtake of Michael Schumacher in 1996. Thus, it's a big challenge for all the participants for whom the final battles this weekend will decide the classification of the 2020 season.

ACTIVITIES

During the meetings by Peter Auto, the spectacle isn't just out on the track. It's also in the paddock where the mechanics are hard at work, on the pitlane where the drivers are preparing to go out and also behind the scenes with different activities. Estoril Classics is no exception to this rule and on the programme is the participation of the Amicale Spirit of Speed, one of the biggest European clubs of collectors of historic racing motorbikes, which has already announced the presence of iconic models like the Yamaha YZR 500 OWF2 ridden by Wayne Rayney in 1993, Sete Gibernau's 2006 Ducati GP6 Moto GP 990 and Garry McCoy's 1998 Honda NSR-V2. In addition, there will be a dynamic demonstration of rally cars - and not just any - but those fabulous WRC machines, the Group Bs!
